ADDENDUM TO JOURNAL

OFFICE OF LEGISLATIVE COUNSEL

Monday - 12 April 1965

STAT 1. [] - JSW) Talked with Congressman George Miller, Chairman of the House Science and Astronautics Committee. Mr. Miller was most interested in getting a thorough briefing on the Soviet space program in order that, as he expressed it, he would be properly equipped to exercise his responsibilities in passing on the U. S. space program. I assured him we would be happy to do this at a time convenient to him. It appeared, in all likelihood, he had heard about our briefing of Senators Anderson and Smith. Mr. Miller stated he would have no time before the Easter recess but would be in touch with me as soon as he returned from the West Coast.
